

IN THE NEXT ISSUE

The next issue of *Cancer Control* will focus on evidence-based care in geriatric oncology. Among the authors and articles are:

"Guidelines for the Treatment of Older Cancer Patients," by Stuart M. Lichtman, MD

"Comprehensive Geriatric Assessment," by Darryl Wieland, PhD, MPH, and Victor Hirth, MD, MHA

"Use of Comprehensive Geriatric Assessment in Older Cancer Patients: Review of Specific Studies," by Martine Extermann, MD

"Management of Acute Myelogenous Leukemia in the Elderly," by Ramalingam Rathnasabapathy, MD, and Jeffrey E. Lancet, MD

"Anemia, Cancer, and Aging," by Lodovico Balducci, MD

"Evidence-Based Use of the Colony-Stimulating Factors in Elderly Cancer Patients," by Gary H. Lyman, MD, MPH, FRCP(Edin), Nicole Kuderer, MD, Olayemi Agboola, MS, et al

Also included will be Clinical Research Protocols for Geriatric Oncology Patients, Ten Best Readings Relating to Geriatric Oncology, Continuing Medical Education, and the 2003 Index for Volume 10 of *Cancer Control*.

Look for your issue in November 2003.
