

The next issue of *Cancer Control* will focus on stem cell transplantation. Among the authors and articles will be:

“Nonmyeloablative Allogeneic Stem Cell Transplantation Using Alternative Donors,” by Timothy F. Goggins, MD, and David A. Rizzieri, MD

“Considerations for Targeting Malignant Stem Cells in Leukemia,” by Monica L. Guzman, PhD, and Craig T. Jordan, PhD

“Stem Cell Transplantation in the Fetus,” by Marcus Muench, PhD, and Alicia Barcena, PhD

“Stem Cell Transplantation for Multiple Myeloma,” by Cristina Gasparetto, MD

“Telomerase and Stem Cells,” by Ngaire Elwood, PhD

Also included will be Continuing Medical Education, Ten Best Readings, and Clinical Research Protocols relating to stem cell transplantation.

Look for your issue in March 2004.

Cancer Control is accessible at <http://www.MoffittCancerCenter.org/ccjournal>.
The CME questions also can be answered online.
