## Target Audience

The principal aim of this issue of *Cancer Control* is to provide an update on screening and early detection of breast cancer for oncologists and other healthcare professionals who treat patients with cancer.

## Educational Objectives

After reading this issue of *Cancer Control*, clinicians will be able to:

- utilize advances in imaging, duct secretion evaluation, and proteomics in breast evaluation
- effectively manage benign but high-risk breast lesions
- follow patients with *BRCA* mutations after prophylactic surgeries
- recognize population groups who receive inadequate cancer screening
- use visual aids to optimize informed consent for some patients
- consider radiosurgery in options for managing metastases to the spine

## Instructions

### To receive CME credit:

- Read the articles, then complete the posttest answer sheet, registration form, and evaluation on page 424.
- Submit the answer sheet, registration form, and evaluation with the \$15.00 CME payment. The posttest must be completed before the expiration date of October 1, 2008.
