

IN THE NEXT ISSUE

The next issue of *Cancer Control: Journal of the Moffitt Cancer Center* will focus on cancer pain management. Among the authors and topics are:

"Interventional Management of Cancer Pain," by Rafael Miguel, MD, of the H. Lee Moffitt Cancer Center & Research Institute

"Neurophysiology of Cancer Pain," by Joan M. Regan, MB, BCh, FFA, RCSI, and Philip Peng, MBBS, FRCPC, of the Toronto Western Hospital

"Medical Management of Cancer Pain," by James F. Cleary, MD, of the University of Wisconsin Comprehensive Cancer Center

"Routes of Opioid Analgesic Therapy in the Management of Cancer Pain," by Rom A. Stevens, MD, of Northwestern University and Salim M. Ghazi, MD, of the Mayo Clinic, Jacksonville

"Critical Evaluation of Chemical Neurolysis of the Sympathetic Axis for Cancer Pain," by Oscar A. de Leon-Casasola, MD, of the Roswell Park Cancer Institute

"Nonpharmacological Interventions With Chronic Cancer Pain in Adults," by Elizabeth M. Thomas, PsyD, PhD, and Sharlene M. Weiss, RN, PhD, of the University of Miami School of Medicine

The regular departments in *Cancer Control* will feature Clinical Research Protocols on Pain Management, Oncology Pharmacotherapy, Ten Best Readings on Pain Control, Supportive Care, and Infections in Oncology. Also included will be a special report on *"Strategies for Combining Chemotherapy and Biotherapy in Melanoma,"* by Antonio C. Buzaid, MD. Look for your issue in March 2000.

Cancer Control is accessible on the World Wide Web at <http://www.moffitt.usf.edu/ccjournal>. The CME questions also can be answered online.
