

IN THE NEXT ISSUE

The next issue of *Cancer Control* will focus on sarcomas. Among the authors and topics are:

"Radiographic Imaging of Musculoskeletal Neoplasia," by Timothy G. Sanders, MD, and Theodore W. Parsons III, MD, FACS, at the Wilford Hall Medical Center at the University of Texas at San Antonio

"Fine-Needle Aspiration Biopsy of Sarcomas and Related Tumors," by William G. Ward, MD, Paul Savage, MD, and Carol A. Boles, MD, at the Wake Forest University Baptist Medical Center, and Scott E. Kilpatrick, MD, at the University of North Carolina-Chapel Hill

"Molecular Abnormalities in Tumors of Bone and Soft Tissues," by G. Douglas Letson, MD, and Carlos Muro-Cacho, MD, PhD, at the H. Lee Moffitt Cancer Center & Research Institute

"Gastrointestinal Stromal Tumors," by Leah Strickland, MD, G. Douglas Letson, MD, and Carlos Muro-Cacho, MD, PhD, at the H. Lee Moffitt Cancer Center & Research Institute

"Modular Endoprosthesis for Children with Malignant Tumors of Bone," by Michael Neel, MD, and G. Douglas Letson, MD, at the H. Lee Moffitt Cancer Center & Research Institute

"Unplanned Surgical Excision of Tumors of the Foot and Ankle," by H. Thomas Temple, MD, David S. Worman, MD, and Walid A. Mnaymneh, MD, at the University of Miami School of Medicine

"Hyperthermic Isolated Limb Perfusion for Extremity Sarcoma," by Christina J. Kim, MD, Chris Puleo, PA-C, G. Douglas Letson, MD, and Douglas Reintgen, MD, at the H. Lee Moffitt Cancer Center & Research Institute

The departments in *Cancer Control* will feature Clinical Research Protocols on Sarcomas, Imaging in Oncology, Ten Best Readings on Sarcomas, and Oncology Pharmacotherapy. Look for your issue in May 2001.

Cancer Control is accessible on the World Wide Web at <http://www.moffitt.usf.edu/ccjournal>. The CME questions also can be answered online.
