

COE Data Research Internship

Hands-on learning in geospatial and health behavior data analysis and visualization for undergraduate and graduate students.

In office & remote · Tampa

Unpaid · 10+ hrs/week

Rolling deadline

PROJECTS

COE DataPoints

Contribute to and learn about monthly infographics on a cancer or health topic, shared with Moffitt researchers and the community on social media.

COE Outreach Growth

REQUIRES GIS + ADVANCED STATISTICS

Learn about where and how often our teams provide health education and free cancer screenings. Your findings guide COE leadership on expanding our footprint and reporting progress to NCI.

Community Health Needs Assessment

Learn how to analyze community survey data from our 2022 HINTS-based survey on topics like HPV and COVID-19 vaccination, cancer risk, genetic testing, clinical trials, and discrimination.

Learn about

- Scientific writing
- Data visualization
- Responsible AI use for data communication
- Presenting research
- Geospatial methods
